

Detached List Marker Rail

- * Rail item 1 keeps its marker and body together.
- * Rail item 2 keeps its marker and body together.
- * Rail item 3 keeps its marker and body together.
- * Rail item 4 keeps its marker and body together.
- * Rail item 5 keeps its marker and body together.
- * Rail item 6 keeps its marker and body together.
- * Rail item 7 keeps its marker and body together.
- * Rail item 8 keeps its marker and body together.

Ordinary prose after the list remains a paragraph.

True Two Column Control

LEFTSTART the genuine left column is read completely before the right one. Its ordinary prose wraps through a narrow measure for several lines, proving that a list-marker repair cannot broadly reconnect neighboring page columns. More words extend the vertical overlap and LEFTEND closes this column.

RIGHTSTART the genuine right column follows the complete left column. Its ordinary prose also wraps through a narrow measure for several lines, keeping the central gutter open while preserving independent reading order. More words extend the vertical overlap and RIGHTEND closes this column.

Numeric and Nested Marker Rails

- 2010-2014: Numeric-leading rail item 1 keeps its body.
- 2020-2024: Numeric-leading rail item 2 keeps its body.
- 2030-2034: Numeric-leading rail item 3 keeps its body.
- 2040-2044: Numeric-leading rail item 4 keeps its body.
- 2050-2054: Numeric-leading rail item 5 keeps its body.
- 2060-2064: Numeric-leading rail item 6 keeps its body.
- 2070-2074: Numeric-leading rail item 7 keeps its body.

- - Nested alpha body one.
 - Nested alpha body two.
 - Nested alpha body three.

Prose after both repaired lists remains visible.
