PL999 Fixture - Concept - General

Mixed Orientation Chrome Fixture

Regional mapping frames the exploration story.

Its observations accumulate from three vintage surveys.

Core plugs anchor the porosity transforms firmly.

The uncertainty envelopes tighten with every new well.

1. A footnote that must survive the bottom band.

Interference testing confirmed the compartment model.

A wide correlation panel needs the landscape sheet.

Sixteen wells hang from the datum on a single spread.

PL999 Fixture - Concept - General

Interlude,

a divider page interrupts the running argument here.

Facies belts migrate basinward through the interval.

Their geometries echo the modern shelf analogues well.

A second panel compares the depth conversion cases.

Both cases keep the crestal wells inside the closure.

Development phasing follows the drainage strategy.

Early water injection protects the plateau target.
